SPECIAL INSTALLATION INSTRUCTIONS:

The RomaBrick profile, molded from reclaimed Italian bricks, creates the foundation for this period style home. Notice the RomaBrick corners used as window sills and as headers on the arched windows. This adds authenticity to the wall by showing the full depth of the brick.

The grout color specified represents a similar color palette to the brick profile shown, which will soften the contrast between bricks.

When applying a standard grout technique each piece is laid 0.5" apart. A grout bag is used to fill joints with mortar and force grout into any voids. The joints are then struck back to expose the edges of each stone.
