SPECIAL INSTALLATION INSTRUCTIONS:

Notice how the stone always ends at a window surround or door frame. These raised design elements give the stone veneer a place to start and stop without seeing the sides of the stone veneer. This is key to creating authentic stone structures.

The grout color specified represents a contrast to the color of the brick profile shown, which will bring more attention to the varying color tones within each brick.

When applying an overgrout technique each piece is laid 0.5" apart. The grout should overlap the face of the veneer, widening the joints and making them very irregular.
