SPECIAL INSTALLATION INSTRUCTIONS:

In the installation above, notice the distribution of stone colors. It is recommended to layout your stone pattern on the ground before installation to ensure good distribution of colors.

The grout color specified represents a contrast to the color of the stone profile shown, which will bring more attention

to the varying color tones within each stone.

When applying an overgrout technique each piece is laid 0.5" apart. The grout should overlap the face of the veneer, widening the joints and making them very irregular.
