### SPECIAL INSTALLATION INSTRUCTIONS:

The Cypress Ridge profile above works in concert with wood beam window headers and brick window sills to complete the Italian farmhouse appearance.

The grout color specified represents a contrast to the color of the stone profile shown, which will bring more attention to the varying color tones within each stone.

When applying an overgrout technique each piece is laid 0.5" apart. The grout should overlap the face of the veneer, widening the joints and making them very irregular.
