

Cleaning Eldorado Limestone Fireplace Surrounds

For routine cleaning wipe down with a damp cloth or sponge. Avoid using any cleaners as they may contain chemicals or color that could cause discoloration. To remove stains use a Marble or Granite stain remove available at any home improvement store. Fireplaces in the Summer Wheat, Oak Barrel or Antique Castello that have been discolored during cleaning may need to have more color added to the area. A touchup color bottle is provided in its original box. The color should be blotted on and around the affected area with a stain rag or texture sponge. Oyster Shell units can be lightly sanded or scuffed to remove any surface discoloration, 120 grit sandpaper is recommended. If the Surround is in an area susceptible to staining resealing may be necessary, speak to a marble or granite specialist regarding sealer options.
