Eldorado Outdoor Vs. Concrete Block

The sheer magnitude of materials, time and manpower required to build a CMU Concrete Block kitchen compared to Eldorado Outdoor is well illustrated in this “example”. Eldorado Outdoor allows you to create beautiful and authentic masonry outdoor spaces in less than half the time compared to traditional building techniques. The strong, yet lightweight material doesn’t require additional concrete footings, bending rebar, or any of the mess, waste and time associated with CMU installations.

Cabinets & Accessories

The Building Blocks. Eldorado Outdoor products quickly assemble into a virtually limitless combination of configurations. Each piece is made of glass-fiber reinforced concrete (GFRC) which can be installed on any solid flooring surface without concrete footings or rebar.

Eliminated is construction waste and additional time associated with traditional masonry block installations. Eldorado Outdoor products can be assembled in just hours; even cut-outs for custom features such as barbecues, sinks, drawers and burners can be done on-site.

Because Eldorado Stone replicates natural stone, variations should, and can be expected. Even though colors in this brochure are as close to the actual stone as possible, photographic and printing techniques — and actual viewing conditions — can alter perception of color.

If you would like more information on prices, availability of product, the name of your local distributor, or answers to any questions not covered in this brochure, please contact us.
