

Premium Architectural Solutions for Masons & Installers

Explore a diverse range of industry-leading brands and high-performance manufactured products crafted to enhance your reputation.

Westlake Royal Stone Solutions

Westlake Royal Stone Solutions offers an extensive portfolio of architectural stone veneer to meet the needs of any project level, style and lifestyle.

No other national manufacturer offers the regional supply and support provided by Westlake Royal, ensuring you get the personal touch and product availability you deserve. Our product portfolio provides limitless design opportunities to suit a wide range of styles and budgets, making it easy to meet your customer's needs. The quality and aesthetic of our architectural stone veneer, combined with your installation expertise, can create projects that are virtually indistinguishable from stone and other natural materials.

Our Added Value

Backed by decades of industry leadership and manufacturing expertise, Westlake Royal is committed to providing products that are high quality, install quickly and add value. With six diverse brands to choose from, no other manufacturer can match the range, color consistency and selection of design solutions we offer.

Scale & Availability—We manufacture the products your customers demand, in the regions where you install, and have the capability to scale up as your business grows.

Brand Equity—As the original manufacturers of architectural stone veneer, we take pride in having built North America's most recognized brands and delivering high-quality products to enhance your reputation and meet your customer's needs.

Expertise—We are committed to being a driving force in the decorative stone industry. From increasing installation knowledge, to Warranty and Code Compliance training, to a leadership role with the National Concrete Masonry Association, our teams put an unmatched depth of technical expertise and practical resources in your hands.

Design Solutions—Through ongoing research and development, we not only design products that are innovative and beautiful but are engineered to solve design challenges and increase installation efficiencies. Additionally, our collections have expanded beyond stone to include modern profiles that resemble other popular materials such as tile, brick and wood. We have the perfect solution for achieving a sleek and modern look, quaint country feel, formal atmosphere or casually elegant ambiance. Our wide array of options create more opportunities for masons to expand a project.

Supporting Products—As a commitment to serving you beyond stone, we also manufacture products that support your installation needs:

- **Drain-N-Dry™ Lath** is an all-in-one rainscreen product that helps you build a healthier wall.
- **Craftshield®** coating is a protection treatment that preserves a stone's look and feel.
- **Flex-N-Dry® Tape** offers a soft-joint solution that leaves your installation looking professional and clean.

Nationwide Distribution—Unlike most local and regional manufacturers, we have partnerships that span across the country, allowing for popular products to be stocked on the ground in each market. That means you can expect the product to be available where you install.

Dedicated Team—Our seasoned team members work daily to produce the best possible stone, from making molds and ensuring quality control, to carefully packing stone before it ships. As a partner, you can rely on our technical, sales and customer service teams to be dedicated to supporting your project every step of the way, through to completion.
